Electra-Kool™ FILTER VENTILATOR SYSTEMS

cool, ventilate and/or pressurize electrical & electronic control enclosures. They are an after-market solution to panels that become overheated, dusty & dirty in the operating environment. Purchase and operating cost is much less than air conditioners or vortex tubes! Many thousands have been sold since their inception in 1980.

Systems are fitted with micronic pleated paper filters with a prefilter to extend life. Five sizes (60 - 1400 cfm) are stocked for use in enclosures from 1-1000 ft.

Filter/Ventilator Systems

Electra-Kool™ FILTER BLOWER SYSTEMS™ are fitted with metal mesh filters and are used to cool and ventilate DC motors. Five sizes are stocked from 500 - 3000 cfm.

--Electra-Kool™ FILTERKITS™ are a "bolt-on" solution where a filter is needed on a filterless blower. Choice of pleated paper or metal mesh. The kits have all the hardware necessary to mount on any blower inlet side.

CUSTOM Electra-Kool™ PRODUCTS can be made for special applications or for use on original equipment. Some choices are power choices, HEPA type filters, weatherhoods, brackets for wall or floor mounting, flange on inlet, etc.
