

### **Original Equipment Manufacturers**

Mini & Maxi Skimmers™ for Original Equipment Manufacturers (OEM's) are sold directly to provide minimum cost. Thousands have been sold to parts washer manufacturers over the years. A standard industrial-type "off-the-shelf" product might suffice - or a custom oil skimmer can be easily made. Considerations include:

- Type of motor:** AC, DC, Air, Explosion-Proof, etc.
- Motor Cover:** No cover, stainless shroud type, plastic, etc.
- Power:** 115/1/60, 220/1/50, 12 or 24 volts, air motor, variable speed, etc.
- Metal(s):** Steel, stainless
- Belt Type:** Cog or flat polyurethane or stainless steel
- Belt Width/Length:** From 1" to 4" wide, 1 - 4 belt(s), from 5" to 100 ft. down
- Outlet:** Our standard type(s), location of outlet. "steep slope" for viscous or slow-flowing oils, etc.
- Accessories:** Timer, ground fault interrupter, handle, outlet hose extension. Others as requested.
- Packaging/Marking:** With or w/o labeling, bulk or individually packed/masterpacked.
- Other?** Give us a challenge!

An OEM "assembly" number is assigned for ordering purposes. This identifies the product as unique and exclusive to that customer and this assembly number product will not be sold/quoted to any other firm. A "manufacturing" sheet is written for the assemble number and used for production. All products are electrically and functionally tested prior to packaging. Records of serial numbers/shipment dates are maintained.

We stress quick and on-time shipments along with good service. The opportunity to develop a Mini or MAXI-Skimmer™ for your product is invited. Please call and ask for our OEM sales department.
